#### GUARANTEED MORTGAGES FOR SALE IN AMOUNTS OF \$1,000 AND UPWARDS

These mortgages are the best investments, because (1) each is a first lien on fee—simple property worth at least 50%, more than the amount of the mortgages; (2) it is unconditionally guaranteed by our companies both as to title and prompt payment of principal and interest; and (3) the investment yields a good rate of interest and NO INVESTOR HAS EVER LOST A DOLLAR IN THESE MORTGAGES OR SUFFERED ANY DELAY IN PAYMENT OF PRINCIPAL OR INTEREST.

The investor is at no expense whatever, and receives a check from the Company for his interest the day it is due.

The purchasers of these mortgages include many of the best known corporations and individuals in Baltimore, among them being trustees, savings banks, charitable and religious institutions.

#### FOREWORD

This book is issued by The Voluntary Relief Department of the Western Maryland Railway Company, in the belief that its pages will prove interesting to its members, and will serve to brighten the leisure hours of our own tolks, for whose benefit it is published.

The present The Voluntary Relief Department of Western Maryland Railway Company represents a re-organization effected May 14, 1914, on which date, by agreement, the Western Maryland Railway Company assumed general charge of the Department, responsibility for its operation and the discharge of its obligations in conformity with the Rules and Regulations thereof.

The original organization commenced operation August 1, 1885, and was known as The West Virginia Central Relief Fund of the West Virginia Central and Pittsburg Railway Company, comprising part of what is now known as the Western Division.

On August 1, 1909, it was re-organized as the West Virginia Central Relief Department of the Western Maryland Railroad Company, and effective May 11, 1911, its operations were extended to embrace the employes of the Eastern Division, after which date it was known as The Voluntary Relief Department of The Western Maryland Railway Company.

Upon its re-organization on May 14, 1914, its operations were broadened to include a Savings and Loan Feature. On January 1, 1916, the Superannuation Feature became effective.

The Rules and Regulations under which it is now operated, embracing, as they do, all the various features of the Department, are too bulky to incorporate in this book. It is felt, however, that the rules under which the old West Virginia Central Relief Fund, the "grandfather" of the present Department, was inaugurated, would be of peculiar interest to our members at this time, because from it we see the far-reaching strides that have been made since its beginning.

"For the relief of employes of the West Virginia Central and Pittsburg Railway Company who may be disabled, and the families of those who may lose their lives, it is proposed to establish a fund, commencing with the first day of August, 1885, to be known as "The West Virginia Central Relief Fund.

"Each and every employe will be required to contribute toward the support of this fund as one of the conditions upon which he enters the employ of the Company.

\*\*Disbursements for easualties and deaths will be made by the committee or in such manner as they direct.

"The committee will consist of seven persons, to be selected as follows:

"All mines at which there are between one hundred and two hundred members will be entitled to one committeeman, and mines having over two hundred members, two committeemen; one committeeman for those employed in running trains and working in shops; one from those employed in working upon repairs of road, and three to be selected by the Company. The committee to serve for one year, each mine or class of employees to select their own committeemen.

"The committee shall elect a chairman, executive committee, and a secretary and treasurer, who shall serve without compensation. All moneys collected shall be deposited in a bank to be designated by the committee, and to be held subject to the order of the committee.

"All employees to be assessed forty cents per month, except those receiving one dollar and lifteen cents (\$1.15) per day or less, who will be assessed twenty-five cents per month. All assessments to be collected or retained by the Paymaster of the Company and paid into the Treasury of the Association.

"Benefits—For two weeks' disability or more. Five Dollars per week shall be paid after the first week, benefits to cease after twelve weeks from date of accident, but may be extended by a two-third vote of the committee.

"Disability must be from actual casualty while in the performance of duty assigned the person by the Company; not from injury, strain or otherwise that may be due to weak condition of the body. In addition to the weekly allowance, in case of loss of limb, One Hundred and Fifty Dollars will be allowed, and upon two-thirds vote of the committee, Seventy-five Dollars additional may be paid toward getting an artificial limb.

"Deaths—To the widow or legal heirs, or to the person named by employe, Four Hundred Dollars will be paid when a member dies from accident, and One Hundred Dollars when death is from natural causes.

"Upon the execution of a good and sufficient release of The West Virginia Central and Pittsburg Railway Company from all claims and demands growing out of or based upon the accident by which loss of life or limb is caused to any of its employes, the Company will pay one-half of the payment on account of a death, and one-half of the payment for loss of limb, as specified above, so that only one-half shall be paid out of the relief fund raised by the employes, and the Company will also pay \$1,000 into the credit of the relief fund, at once, to aid in the establishment of the same.

"Notice of accident must be given to the committee within three days after the accident,

"Committeemen for the ensuing year are to be selected on July pay-day, 1885, and at the same time in each succeeding year for the year following. In case of a vacancy occurring in the committee, such vacancy will be filled on the pay-day following, and from the mine or class in which such vacancy occurs,"

On or about the date on which this book is going to press, the gross earnings of the Relief Feature of this Department are on the basis of nearly \$150,000 per year; the Savings Feature has net deposit of nearly \$275,000, with loans to employes of about the same amount. It has nearly 1,000 regular depositors through payroll deductions, and operates a printing plant, whose gross earnings are nearly \$2,000 per month.

The annual report of the Department for the year 1918 is issued in this book, and while its figures are not sufficiently current to be of especial interest to the members, yet, it reflects the operation of the Department, particularly the Relief Feature, under the adverse conditions growing out of the unprecepented epidemic of influenza and its associated diseases which invaded the territory served by our road during the closing months of 1918, and the members will see by the figures, what great benefit the Relief Department was to those who were afflicted.

The publication of this book has been made possible by the subscriptions of its advertisers, and we bespeak for these advertisers the consideration of our employes generally, with request that wherever possible, your patronage be extended to them. Their subscriptions prove beyond a doubt their interest in us. Let us reciprocate and prove our interest in them.

W. T. STRINGER SUPERINTENDENT RELIEF DEPARTMENT

AVING seen the text which has been written for this book; realizing the incompleteness of it without something being said of our Superintendent; knowing that his modesty and retiring disposition would prevent him from writing, or even editing anything about himself, and believing in giving credit where credit belongs—this Committee submits the following sketch of our Superintendent so as, in our opinion, to complete what is to be published:

#### WILLIAM TAYLOR STRINGER

Was born in Hillsboro, Loudon County, Virginia, on the 18th day of March, 1881, attended the Glyndon (Maryland) Graded School and afterwards the Randolph Macon Academy, Front Royal, Virginia, where he was graduated in 1896. After graduation, he entered the Law Office of the late William Pinkney Whyte, Governor of Maryland, as a clerk, and while there took up stenography.

In March, 1898, he entered the service of the Western Maryland Railway Company as stenographer to the General Auditor, and has since that time been continuously in the service of the Company, filling the positions of—

Stenographer to General Auditor

Stenographer to Train Master

Stenographer to General Freight and Passenger Agent

Chief Clerk to Freight Traffic Manager

Secretary to General Manager

Chief Clerk to Vice-President and General Manager

Chief Clerk to President

Assistant to President, and

in April, 1915 was elected Superintendent of this Department.

Such a record could have only been maintained by diligence, efficiency and loyalty, and these are the traits which he possesses, and which have enabled him to build your Department to where it now stands, as is reflected by the statements that are regularly issued.

Realizing that Mr. Stringer is as well known to the Members of the Department and the employes of the road as he is, we feel that whatever we might say regarding his personality would be superfluous, and that all justly consider him their friend.

On October 24th, 1905, he was married to Miss Ruby M. MacDonald, of Shepherdstown, West Virginia—their home is in Glyndon, Maryland.

### National Hot Water Locomotive Boiler Washing System

This system utilizes the waste heat units of the Locomotive Blow Off, storing the Blown Off water in one reservoir to be used for washing out Locomotive Boilers and condensing the blown off Steam and storing it in another reservoir to be used in refilling locomotives with hot water.

The operation of the National Hot Water Locomotive Boiler Washing System is as follows:

The locomotive, after being run into an engine house equipped with this system, is connected to the Blow Off Drop and is then blown down. The steam, water, and sludge are separated in a special Separator Tank: the steam is condensed in a special Vacuum Condenser and then flows into the Filling Tank: the blown off water flows into the Washout Tank and the Sludge is automatically emptied into the sewer. The Washout water is tempered by the automatic admission of cold water and pumped through a system of mains and drops out so that it is available at any stall in the Engine House. The Filling Water, which is maintained at a temperature of 180 to 200 degrees F., without the use of live steam, except in cases of emergency, is pumped through a system of main and drops so that it is available at any stall.

The National Hot Water Locomotive Boiler Washing System increases the life of boiler tubes, eliminates cracked sheets and broken stay bolts, saves fuel and increases locomotive hours by reducing the time necessary to blow off, wash out, refill and get-up steam.

## Peace Time—and Time Pieces

Peace time brings a more plentiful supply of Ball Watches—the best time piece: the time piece that was especially designed to meet the exacting official requirements of the Great Railroad Systems of the United States and Canada; and it is therefore rightfully entitled to the honors conferred upon it as the "Official Railroad Standard".

The Ball Watch begets the confidence of Railroad Men everywhere because of its unusual performance. Day in and day out it ticks off the seconds, the minutes and the hours consistently and accurately—a sturdy, dependable, reliable watch under every condition of service and use.

Join the throng of Ball Watch users. Ask your Dealer.

Provide for uninterrupted lubrication under all conditions, and at the same time gives ease of operation, increased oil mileage and insurance against accidents

DETROIT LUBRICATOR COMPANY DETROIT, MICHIGAN

#### Are You a Member of the Relief Feature?

If you are not over 45 years of age, see one of the Medical Examiners at once for examination. He will tell you of the accident, sick and death protection it affords. Your occupation is a hazardous one. Aren't you willing for the sake of your loved ones, to make provision against the loss of time resulting from disability?

Is your family protected as fully as you are able, against the time when they may be left without your helping hand? Are you looking forward to old age, and to the fact that you can't work all your life? The Relief Feature protects yourself and family against all these uncertainties.

The Relief Feature saved many a family from want when the dreaded Flu made its inroads in our community a year ago.

The Relief Feature extends to you the happy assurance that old age will not be that grim spectre which so many of us look forward to with fear and trembling. At 65 over half the men in this country are dependent upon friends, relatives or charity.

Ask some of our Superannuated members about the independence they enjoy.

#### One of them tells us:

"I cannot refrain from calling you Brother, for I feel that way in my heart.

"I want to thank you and all the officials of the Relief and the Western Maryland Railway that aided me in getting on the pension that will help me wonderfully in my last sad days of my life.

"I cannot speak too highly of the Relief, and I think every man should join it for their own protection, as well as others. Once more I will say 'Thank you,' "

#### Another says:

"Your letter of December 19th received a few days ago, and I feel very much indebted to you for the assistance you gave me in granting me a Pension.

"Everything is perfectly satisfactory to me, and I hope that some day I am in position to return your kindness.

"Thanking you again for your assistance, I remain."

While there is yet time, give yourself a self-examination into your future. Think of your family and those dependent upon you. If it reveals that you are not now doing your part while you are in good health and normal strength, get busy at once—you'll never regret it.

## The Best Method of Firing

A prominent Superintendent of Motive Power recently said that by putting an expert on a locomotive to supervise all the work and help the crew get the most out of every point that would further the economical operation of the machine, a big saving could be effected in fuel and water even with locomotives making showings better than the average.

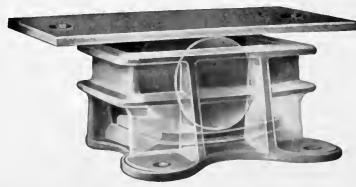

If the constant presence of an expert would bring this about—and no one denies that it would—

#### Why Not Have An Expert On Every Engine

The system of home study training inaugurated by the International Correspondence Schools of Scranton, Pa., if properly followed, will make experts of every engineer and fireman. Let the I. C. S. show you how they can help you be an expert and thus qualify for promotion.

A letter or post card will promptly bring this information to you.

## Do You Own Your Own Home?

The illustrations of homes owned by our employes represent only a very few of the number that have been purchased, built, or freed from debt through the Savings Feature of the Relief Department. In fact, nearly 300 of our employes and their families have been made happy in the possession of their homes, through this means.

Are you among those who are paying rent? Have you ever thought that the amount of rent that you have paid would, in many cases have been sufficient to have purchased your home? Has anybody ever told you of the advantages and reasonableness of the plan by which the Relief Department can help you? Don't pay rent all your life, but begin now, and it will surprise you how quickly you are able to own your own home.

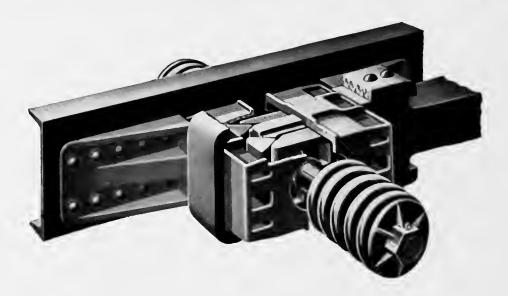

We have letters from many of our borrowers, expressing satisfaction in the manner in which their loan transactions have been handled. Back in 1915 we received the following letter from the first borrower to construct a home through funds advanced by this Department:

"As a borrower of the Relief Department (and I expect the first to build a home by day's work, overseeing the construction of it personally, and seeing that all bills were paid promptly through your Attorney. ....., from money advanced by you as requested), I feel I would not be doing yourself and the Relief Department justice if I did not express myself on the prompt and businesslike manner in which the matter was handled. I feel I could not say too much in favor of that part of your Department. Personally, I think it is one of the grandest things a laboring man could expect. Another part of the relief in connection with a loan that appeals to me very strongly is that part that requires a borrower to take out insurance enough to eover the amount of the loan. It is a good guard against the unexpected in a ealling so hazardous as ours. It is a great pleasure for me to think if in case anything should happen to me, my wife and family will be left a fine place they can call their home and free from debt. Life seems more of a pleasure since we have our own home, after renting for so many years.

"I suppose you have the last of the bills by this time, which finishes up all bills in connection with the property, and in closing I want to thank you *very*, *very* kindly for our pleasant business relations, and at any time if I can favor you in any way, please let me know."

## Cardwell Friction Draft Gear

ٵ ڴؚڲٷؙڟڰڣڟڰۼڟڰۼڟڰڣڟڰڣڟڰٷڟڰٷڟڰٷڟڰٷڟڰٷڟڰٷڟڰٷڟڰٷڟڰٷڟڰٷڟڰ<u>ٷ</u>ڐڰ

The purpose of a draft gear is to protect the car and its lading against the destructive effect of the forces developed in service. Experience proves that no arrangement of spring gear can do this, and a good friction draft gear is an essential element in a well constructed freight car.

The results of practical operation extending over a number of years as well as exhaustive laboratory tests prove the real excellence of the Cardwell Friction Draft Gear.

Its efficient protection of the car against the effect of shocks, that with any other draft gear would be dangerous, combined with its simplicity of construction and ease of application, make it the best draft gear ever applied to a car.

## Union Draft Gear Company

CHICAGO OFFICE McCormick Building CANADIAN OFFICE
627 Transportation Bldg., Montreal

Only within the last month one of our borrowers says:

"You have, through the Relief Department, assisted many a laborer to get a home that otherwise would never have been able to make the first payment. I know from actual experience. I found the Relief Department could take care of my wants and were overly anxious to lend a helping hand, and in a very short time I was able to make my arrangements for the building of a home. It may be of interest to some people to know how easy it is to stop paying rent and pay it to yourself. About four months after I explained my case to the head of the Relief Department I was moving into a brand-new home of my own, and bade farewell to the landlord class. We are all so well pleased with our new home that for a period of time I could hardly believe such a change could come about. It was almost too good to be real. You may be compelled to make some real sacrifices for a while, but the effort is worth it. Your landlord will never write you a deed after you have paid for his house in rent. Why not try the Relief Department for a landlord. They will treat you right, and you will be treating yourself right. You owe it to your family in case anything should happen to you to leave them with a home free of debt. That's what it means to buy through the Relief Department."

The above are typical of a large number of letters we have received from satisfied borrowers. Write to the superintendent at Baltimore for full information. He will be glad to help you.

## Are You Saving Any Money?

Are you a self-starter? The turning point in many a man's life is when he becomes a SELF-STARTER. Don't wait. Push your button and start being thrifty. Have a plan. Habitual thrift is a great improvement over occasional thrift. Unless a man can trust himself to keep up a schedule of saving by sheer effort of will—and few of us can—he should adopt an automatic saving plan, or "Thrift at the Source." This is what we all need to help us save money. It simply means that a certain sum is deducted from wages and credited direct to the Savings Depository.

The man who deposits a regular amount on a regular day, and NEVER FAILS, is a better saver than the one who makes a fairly large deposit one day, then neglects his account for a long period.

This is the whole secret of saving—BE SYSTEMATIC. It's very simple isn't it?

The average person will admit that he wishes he could save, that he knows he ought to, and that he could if he really tried. If you are married talk it over with your wife.

You will not miss that small sum regularly deducted from your earnings, but the time may come when it will mean the difference between failure and success.

If you want to know true satisfaction and security, join the army of Savings Feature Payroll depositors today. This army is a thousand strong. Ask them if they have seriously missed the deductions that have been made from their wages for credit to their Savings Accounts?

One of our oldest employes writes:

"It is the best and easiest way to save that I have ever known. I am very grateful to those who made this possible."

Does 6 per cent, look good to you, backed up with assurance of the integrity and safety of the funds?

Write to superintendent at Baltimore, or mention it to any official of the Company, any Medical Examiner of the Department, or any member of the General Committee.

J. M. HOOD

PRESIDENT-WESTERN MARYLAND

1874 - 1902

Mr. Hood who was President of the Western Maryland for nearly thirty years, might well be called the father of the road. By years of indefatigable effort, undaunted by the many obstacles placed in his path, and with a corporation never free from financial embarrassment, Mr. Hood built up a railroad system which not only became a valuable factor in the development of Baltimore's trade, but which was regarded sufficiently high by the Gould interests, to attract their millions in its purchase and consequent development.

Mr. Hood's life work was the building up of the Western Maryland, and his memory is held in the highest esteem by the hundreds of Western Maryland men who labored faithfully and unceasingly under his management.

The employes of the Railroad through its Relief Department, take this opportunity of paying tribute to the memory of Mr. Hood.

## Would you like to know what some of our folks write us about the Savings Feature? Read these.

#### A Department head thus advises his staff:

"I wish to call your attention to Mr. Stringer's letter of December 12th, stating that an extra dividend of 2% for 1919 had been allowed on all interest-bearing accounts as of December 31st, 1919, which means the payment of 6%, which certainly is very gratifying.

"As I have already told you all, I consider the Savings Feature of The Voluntary Relief Department of Western Maryland Railway Company one of the best places to put your money in Baltimore City, and I cannot emphasize too greatly the benefits that you will derive from having accounts therein."

#### One of our depositors passes the following bonquet:

"I am in receipt of copy of your general letter of the 12th instant, advising that the Executive Committee has just declared an extra dividend of 2%, making the total interest to be paid on deposits for 1919 6 per cent.

"This is very gratifying, and you are certainly to be congratulated upon the fine showing you have made,"

#### A friend says:

"You are to be more than congratulated for your untiring efforts put forth in making the Relief Department what it is known to be and recognized as such by all the employes on the system—a department that tries to please its patrons."

#### Another Department head says:

"I am in receipt of your notice of December 12th of the extra dividend of 2% on 1919 savings, and will be glad to give the glad news to the clerks in this office. It is, indeed, a 'source of deep gratification' to me and, I am sure, to all other depositors in the Savings Feature."

#### One of the general officers seems pretty well satisfied see what he says:

"I beg to acknowledge receipt of your letter of the 12th, advising that at a meeting of the Executive Committee of the Voluntary Relief Department an extra dividend of 2% for 1949 was declared, which means that 6% will be paid on all deposits for the year.

"I want to congratulate you on the showing you have made, and I am sure that everyone is pleased with the excellent manner in which you are handling the affairs of the Relief Department."

An officer employing quite a number of men writes them as follows:

"You will note that this is a very good investment for anyone desiring to take advantage of the Savings Feature of his Department, and it would be of mutual interest if you would open account with his Department for depositing your savings."

The following shows he is trying anyhow, and he appreciates the advantages we offer:

"I guess you think that it's no use of me trying to save anything, as I am drawing it out as fast as I put it in the Savings Feature, but that money has certainly helped me out, when if I didn't let you take it off my earnings I would not have it. I do not want to draw any more out till spring, anyway, providing I have steady work. The two weeks I was out of work on account of miners' strike put me back some."

Many letters similar to the foregoing are received from time to time. They are from your fellow workmen. They are trying to get ahead, and write impressively and seriously of their appreciation of the Savings Feature.

Baltimore, Md., December 1, 1919,

To the Members of

The Voluntary Relief Department of

Western Maryland Railway Company.

The Third Annual Report of the operations of your Department is herewith respectfully submitted.

The Department's Profit and Loss Account for the twelve months ended December 31st, 1918, is stated herewith, followed by comparative Income Accounts of the Refief Feature and Savings Feature for the years 1918 and 1917, with explanations of the several changes.

## DEPARTMENT PROFIT AND LOSS ACCOUNT FOR 12 MONTHS

#### Ended December 31st, 1918

	Relief Feature	Superann ation Feature	Savings	Total_
Credit balance December 31, 1917.	\$33,479,35	\$52,459.19	\$ 706.32	\$86,644.86
Credit balance transferred from Income Accounts			712.93	712.93
Funds permanently transferred from Relief Feature		10,150,00		10,159.00
Total	\$33,479,35	\$62,609.19	\$ 1,119.25	\$97,507.79
LESS:

to Superannuation Feature	10.150.00			19,150,00
Total	\$68,035,62	\$ 3,590.84	\$	\$71,626,46
Debit balance December 31, 1918. Credit balance December 31, 1918.		\$59,018.35	\$ 1,419.25	\$25,881.33
Net Debit for 12 months ended December 31, 1918	\$68,035,62			\$60,763.53
December 31, 1918		\$ 6,559.16 ======	\$ 712.93 ======	

#### **RELIEF FEATURE**

#### Statement of Revenues and Expenses for 12 Months Ended December 31st, 1918, Compared with Previous Year

	1918	1917	Increase or *Decrease
REVENUES:			
Assessments Contribution of Ry, Co Interest on Deposits and Accounts Interest on Securities owned Interest on Advances		$\substack{198.06 \\ 2,022.99}$	1,477.21 35,00 * 58,53
Total	\$127,382.97	\$110,860.56	\$ 16,522.41
EXPENSES:			
General Expenses	446.33		\$ 7.500.86 446.33 6.99
Accident Disability Sick Disability Death	24,590,55 48,575,25 80,300,00	21.781.57	26.793.68
Total	\$185,268.59	\$ 90,077.43	\$ 95,191.16
Net Revenue	57,885.62	20,783,13	* 78,668.75
Death Benefit Reserve December 31st		3,900.00	* 3,900.00

#### REVENUES

#### **ASSESSMENTS**

The larger number of employes engaged during the year with consequent membership in this Department accounts for the increase of \$14,958.71.

#### CONTRIBUTIONS OF RAILWAY COMPANY

As these contributions are based on percentage of assessments the increase in this item naturally follows increase in assessments.

#### INTEREST ON DEPOSITS AND ACCOUNTS

To somewhat heavier average bank balances are due increase in this item.

#### INTEREST ON SECURITIES OWNED

The slight decrease in the interest on investments is brought about by an exchange in the latter part of 1917 of \$5,000 par value Kansas and Colorado Pacific Railway Company's 6% bonds for Missonri Pacific Railroad 1% bonds made necessary by a re-organization, which reduced the interest return on such securities to the extent of \$100 per year.

#### INTEREST ON ADVANCES

This item represents net interest earned on advances temporarily made to other features

#### **EXPENSES**

#### GENERAL EXPENSES

A large proportion of the increase of \$7,500.86 in this item is represented by increases in rates of pay of Officers and Employes of the Department. To increased force made necessary by the larger volume of business handled is also attributable a part of the increase. The item of Stationery and Printing which is included under this head shows a slight increase, as also the expenses of Medical Examiners.

#### INTEREST ON BILLS PAYABLE

The item of \$446.33 represents interest paid on funds borrowed from outside sources by the Relief Feature during the closing months of the year in order to meet unusual sick and death claims, references to which are bereinafter made. No similar item was incurred in 1917.

#### INTEREST ON ADVANCES

The item of \$6.99 in 1918 represents interest paid by the Relief Feature on temporary advances from the Savings Feature made for purposes similar to the foregoing. There was likewise no such item incurred in 1917.

#### ACCIDENT DISABILITY

The increase of \$1,143.30 in this item is attributable to the heavier liability represented by the increase in the revenue item of assessments.

#### SICK DISABILITY

The increase of \$26,793.68 in this item is due to the epidemic of influenza, which swept over the country during the three closing months of the year, and to which more specific reference is hereinafter made.

#### DEATH BENEFITS

The increase of \$59,300 is attributable to the epidemic referred to in the foregoing paragraph. To this increase of \$59,300 can be added \$3,900 representing the Death Benefit Reserve as of January 1st, 1918, and which was wiped out.

#### DEFICIT

The deficit of \$57,885.62 as reflected by the Income Account for the year, and which, for comparative purposes, reflects less net revenue than in 1917 to the extent of \$78,668.75 plus \$3.900 Death Benetit Reserve, or a total of \$82,568.75, follows the serious and unprecedented claims upon the funds of the Feature as the result of the epidemic.

#### SAVINGS FEATURE

#### Statement of Revenues and Expenses for 12 Months Ended December 31st, 1918, Compared with Previous Year

	1918		erense or Decrease
REVENUES:			
Interest on Securities owned. Interest on Deposits and Accounts. Interest earned on Leans. Interest earned on Expense Accounts. Interest on Advances. Small Loan Service Fee. Interest earned on Small Loans. Miscellaneous Receipts Printing Plant—Operating Surplus.	122.20	100.21 7,506.77 19,33 1 60	21,366 1,235,60 * 3,99
Total	89 850.97	87,711 80	82,106.1{
ENPENSES:			
General Expenses Interest on Decositors' Accounts (5½%) Interest on Bills Payable Interest on Advances.	$\frac{6,082,10}{1,883,17}$	3,417,96 2,485,88	2,661.14 * 602.71
Total	89,138,04	86,497,21	\$2,610,83
Net Revenue	712.93	1,217,65	° 531.72

#### **EXPLANATIONS OF THE SEVERAL CHANGES FOLLOW:**

#### REVENUES

#### INTEREST ON SECURITIES OWNED

During the latter part of 1917 the Savings Feature invested in 88,000 par value Western Maryland Railway First Mortgage 4% Bonds, which, in 1918, reflected a full interest period on such securities and, therefore, accounts for the increase in this item of 8206.08.

#### INTEREST ON DEPOSITS AND ACCOUNTS

The increase in this item is due to heavier average bank balances on deposit.

#### INTEREST EARNED ON LOANS

The increase of \$1,235.60 in this item is due, of course to a larger number of Mortgage Loans in effect.

#### INTEREST EARNED ON EXPENSE ACCOUNTS

This item represents interest earned on advances made to cover property expense accounts of Mortgage Loan borrowers, and the slight decrease as compared with 1917 is due to the fact that the number of borrowers availing of this privilege have been reduced.

#### INTEREST ON ADVANCES ...

This item represents interest carned on temporary advances made to other Features.

## SMALL LOAN SERVICE FEE AND INTEREST EARNED ON SMALL LOANS

As the Small Loan Feature, to which more specific attention is directed subsequently in this report, was not in effect in 1917, and in fact was not inaugurated until August, 1918, the entire amount of net earnings growing out of this Feature represent an increase compared with 1917.

#### MISCELLANEOUS RECEIPTS

The item of \$140.65 shown under this head in 1918 represents the bank balances heretofore maintained by The Western Maryland Investment Company and The Western Maryland Investment Company of West Virginia, which are the legal vehicles for Mortgage Loans made by the Savings Feature, and which balances were in November, 1918, taken up in the earnings of the Savings Feature.

#### PRINTING PLANT OPERATING SURPLUS

The item of \$466.31 representing net earnings in the operations of the Printing Plant to December 31st, 1918, represents an increase of such amount over the previous year, as the Printing Plant was not purchased and operated until the latter part of 1918. Attention is directed to this item later on in this report.

#### **EXPENSES**

#### GENERAL EXPENSES

This item includes salaries, Building Inspectors' Fees. Stationery and Printing, etc. The increase is due largely to increased proportion of salaries assumed by the Savings Feature and to increase in the item of Building Inspectors' fees, account of larger number of inspections made.

#### INTEREST ON DEPOSITORS' ACCOUNTS

This item has consistently increased with the larger amount of deposits, and to a proportion of the increase is due an increase in the rate of return on deposits. During the first six months of 1917 the return aggregated 4½ per cent and the last six months of 1917 the return was 5 per cent, while in 1948 the interest and extra dividend aggregated 5½ per cent.

#### INTEREST ON BILLS PAYABLE

The decrease of \$602.71 in this item which represents interest paid on money borrowed from outside sources to meet loans is due, of course, to heavier deposits in the Savings Feature enabling a reduction in the liability on this account.

#### INTEREST ON ADVANCES

This item is interest paid to other Features on temporary advances and the increase of \$139.37 is due to the necessity of the Savings Feature borrowing temporarily from the Relief and Superannuation Features during the forepart of the year 1918.

#### **NET REVENUE**

Decrease 8531.72. This item, leaving out entirely the extra dividend paid, was heavier than the previous year, but your Committee felt that so long as a substantial surplus was earned over and above the aggregate interest and dividend of 51/2% that the latter rate of return could well and safely be declared.

#### SUPERANNUATION FEATURE

No comparative Income Account is herein reported. This Feature has no income except from Securities owned, and cash permanently transferred to it from the Relief Feature.

Its obligations are those represented only by allowances made to Superannuated members.

The total payments made to Superannuated members in 1918 and 1917 were as follows:

	Members December 31st	added		Allowances paid	Average Allowance
1918	32	10	1	\$6,691,92	\$23.37
1917	24	8	1	3,912.83	15.28

During the year 1918, the age limit as applying to eligibility for Superannuation allowance was reduced from 68 to 65, and on January 1, 1918, straight allowances according to class were established, superseding the percentage basis heretofore in effect.

The Percentage Pension allowance basis payable by the Railway Company was likewise reduced from 68 to 65 years. Therefore, to the above average Superannuation allowance made by this Department, a substantial pension allowance is added by the Company in each case.

#### GENERAL

#### RELIEF FEATURE

The development of this Feature's gross volume of business continued throughout the year, each month with only several exceptions, reflecting more gross earnings than the previous month. This was the result of decidedly augmented forces employed by the Company, and in fact, labor conditions continued so acute throughout the year, that large numbers of employes were necessarily engaged without physical examination, depriving the Department of this means of accession to its membership.

For the first nine months of the Fiscal year 1918, the Benefits paid by this Feature were consistently favorable

and reflected a downward tendency as to ratio to Gross Earnings, but as previously touched upon in this Report. during the Fall months, the epidemic of Influenza and its associated diseases, general throughout the country. spread among the membership of this Department to a serious degree and abnormally increased its sick and death obligations in the three closing months of the Fiscal In fact, the effect of the epidemic continued to reflect in the amount of benefits payable throughout the first three months of 1919. During these final three months of the year there was distributed to members of the Relief Feature \$32,155.80 in sick benefits, or approximately \$27,000 in excess of the normal sick claims; and to beneficiaries of members who died, there was paid during the same period 862,450,00, of which amount 856,350,00 is directly accounted for by the Influenza and its consequent diseases. Approximately one-fourth of the Department's membership was disabled through sickness. and during the closing three months of 1918, 58 members died as the result of the epidemic.

On October 1st, 1918, the surplus of the Relief Feature amounted to \$27,625.68, plus a death benefit reserve of \$3,650 or \$41,275.68. On December 31st, 1918, the deficit was \$34,556.27. This deficit on March 31, 1919, had increased to \$49,459.72, and inasmuch as it was felt that the effects of the epidemic had then subsided, such deficit was wiped out of the Accounts by the Railroad through reimbursement.

The payment of this abnormal number of sick and death claims was attended with as much dispatch as the availability of necessary information and reports permitted. Funds, through the hypothecation of the Department's securities, were promptly borrowed, and in a large number of cases the beneficiaries opened Savings Feature Accounts, depositing therein such proportion of benefits as were not immediately required.

During the early months of 1919, on account of business conditions, the number of employes under engagement by the Company was considerably reduced with a consequent falling off in the gross revenues of this Feature.

#### SAVINGS FEATURE

The comparative Income Account reflects a most gratifying development of this Feature.

The Surplus from operation was sufficient to justify your Executive Committee in declaring for the year 1918 an extra dividend of  $1\frac{1}{2}\%$  (which is in addition to the guaranteed interest of 4% credited monthly to the accounts). The Surplus of this Feature increased from \$706.32 on January 1, 1918, to \$1,419.25 on January 1, 1919.

The development of this Feature is better demonstrated by the following comparisons:

Σ	Tumber of Deposits	Gross Amounts Deposited	Total Net Deposits December 31st
1936	6,362	\$48,841.56	\$52,590,74
1917	10,121	85,639,76	99,103.15
1918	10,359	$119,\!159,\!31$	169,895,79
		Active Loans	Amount Ontstanding
December 31, 1916		98	\$104,917.75
December 31, 1917		129	\$139,026.74
December 31, 1918		146	\$141,560.18

A large number of the Beneficiaries to whom death benefits were paid on account of the epidemic heretofore referred to, deposited during the closing months of the year, all or part of their Benefits, and which entered largely into the heavy increase in total net deposits, without a corresponding increase in the number of individual deposits—Liberty Loan subscriptions, of course, had the effect of restricting the development of consistent deposits through payroll deductions.

During the year the Savings Feature invested in a Printing Plant; enabling it to take care of part of the printing work of the Railway Company, and gradually its equipment has been augmented, and its scope broadened; so it can handle printing of every description and upon a profitable basis. Its operating surplus for 1918 is reflected in the foregoing Income Accounts of the Savings Feature, and its surplus for 1919 will materially add to the net revenues of that Feature.

During 1918 the Savings Feature inaugurated and made effective a Small Loan plan, for the purpose of providing an emergency measure of relief to employes who are members of the Relief Feature, to discharge meritorious and worthy obligations. This plan has already proven attractive, and beneficial to the members of the Department, 79 having availed thereof at the date of issuance of this Report.

The Mortgage Loan privilege offered by the Savings Feature, due to its advantageous terms and easy and fair rate of return, continues to interest the membership. A number of mortgage loans were repaid in full during 1918, from funds received by members in the form of "back pay," however, the net increase in borrowers has greatly increased during the current year.

During 1948, by appropriate resolution of the General Committee and later approved by an order of the Central Railroad Administration, at Washington, the protection of membership of this Department was extended so as to take care of all members regardless of the road on which work was performed, during the period of Federal control.

The Books of the Department covering the 12 months ended December 31, 1918, were andited by Accountants furnished by the Auditor of the Company and approved by the General Committee, the result of the audit confirming the accuracy of the Books and Accounts.

By order of the Executive Committee.

M. C. BYERS, Chairman

This Book is printed by the printing plant of the Relief Department. Although only purchased and in operation a little over a year, it has largely increased its capacity, and now takes care of practically all the printing requirements of the Western Maryland.

It is also able to handle a great deal of outside business, and offers to all the friends of our employes the service of an up-to-date first-class printing establishment.

Its work has been much and favorably commented upon. One of our patrons says:

"I thank you very much for same and think the job is a credit to the plant."

#### Another says:

#### Another:

"This is, indeed, very creditable work."

Tell the folks you deal with, to get in touch with us if they are interested in modern, first-class, and economical printing.
